Journal of NUCLEAR ENERGY

U. of ILL. LIBRARY
MAY 5 1971
CHICAGO CIRCLE

EDITOR-IN-CHIEF

J. V. DUNWORTH, C.B.E.: *National Physical Laboratory, Teddington, Middx.*

EXECUTIVE EDITORS

D. J. LITTLER: *Central Electricity Generating Board, Grindall House, 25 Newgate Street, London E.C.1*

R. L. MURRAY: *Department of Nuclear Engineering, North Carolina State University, Raleigh, N.C. 27607, U.S.A.*

VOLUME 24

1970

PERGAMON PRESS

OXFORD · LONDON · NEW YORK · PARIS

NOTES FOR CONTRIBUTORS

I—GENERAL

1. Papers from authors in the United States should be submitted to the American Editor—Dr. R. L. MURRAY. Papers from authors in other countries should be submitted to the English Editor—Dr. D. J. LITTLER. All papers should be concerned with original work in the field of nuclear energy. Progress reports and reviews which satisfy the Editors' standards of scientific worth and topicality will be accepted for publication.

2. Fifty free reprints of each paper are supplied. Additional copies can be supplied at a reasonable cost provided they are ordered when the page proofs are returned. A reprint order form will accompany proofs.

II—SCRIPT REQUIREMENTS

1. Scripts should be typewritten on one side of the paper only, and double-spaced. Submission of three copies of the manuscript will expedite review. It will be appreciated if authors will make clear any Greek characters which may be confused with ordinary letters or with other characters. **The name and full mailing address of the author to whom proofs are to be despatched should be given on the title page of the manuscript. The publisher should be notified of any subsequent change of address.** Authors will receive page proofs of their article for correction, together with proofs of any figures which the paper may contain. It is requested that authors check their proofs very carefully and return the corrected set with the minimum of delay to the publisher. **Any substantial alterations, other than printer's errors, may be charged to the author.**

2. Original illustrations, plus photocopies or other reproductions should accompany the manuscript separately, and legends should also be typed on a separate sheet. It is requested that photographs should be kept to the minimum necessary. Line drawings that require to be re-drawn should include all relevant details. If these are already well drawn it may be possible to reproduce them direct from the original, but in this case it is essential that the original drawings or good photo-prints should be provided. Any lettering on diagrams—other than Greek letters, symbols etc.—should be stencilled and should be sufficiently large and bold to permit reproduction when the diagram has been reduced to a size suitable for appearance in the journal. It is not possible to reproduce from 'dye-line' prints, or from prints with weak lines. Illustrations for reproduction should normally be about twice the final size required.

3. References to published literature should be quoted in the text as follows: SMITH (1950)—the date of publication, in parentheses, following the author's name. References should be listed together at the end of each paper and not given as footnotes. They should be arranged in alphabetical order (first author's surname) to appear as follows:

FERMI E. and MARSHALL L. (1947) *Phys. Rev.* **72**, 1139.
WARNER R. K. (1954) *Chem. Engng Sci.* **3**, 77.

It is particularly requested that (*a*) author's initials and (*b*) the volume or part numbers and page numbers are given in every case. Abbreviations of periodicals should be in accordance with the 4th edition of the *World List of Scientific Periodicals*.

4. The text of articles submitted should be concise and in a readily understandable style. The technical description of the methods used should only be given in detail when such methods are new. The essential contents of each paper recapitulated in an abstract. French and German papers should be submitted with English abstracts and titles.

5. To conserve space, authors are requested to mark appropriate portions of the paper (such as description of methods, record of experimental results, etc.) for printing in smaller type.

Publishing and Advertising Office: Headington Hill Hall, Oxford OX3 0BW (Oxford 64881)
Annual subscription: for libraries, research establishments and all other multiple-reader institutions £24 ($60) *including postage. Private individuals, whose department libraries subscribe, may obtain this Journal for their personal use at a reduced price of* £10 10*s* ($30) *per annum.*
Subscriptions should be sent to: Pergamon Press Ltd., Headington Hill Hall, Oxford OX3 0BW

LIST OF CONTENTS

NUMBER 1

M. G. Stevenson and S. J. Gage: Application of a coupled fission mode approach to modular reactor kinetics 1
R. Brogli, K. Junker and L. A. Lys: UoV, a procedure for design calculations of SGHW-type reactors 11
G. W. Eccleston, Jr. and N. J. McCormick: One-speed transport disadvantage factor calculations for general anisotropic scattering 23
T. B. Ryves: Activation measurements of thermal neutron capture cross-sections and resonance integrals 35

Letters to the Editors

M. G. Silk and B. O. Wade: A pulsed neutron determination of the thermal neutron absorption cross-section of cobalt-59 43
G. Pregl, T. Kalin and M. Čopič: Pulsed neutron measurements of the micro-distribution in a graphite pile with empty channels 49
R. M. Patterson, R. P. Christman and E. J. Hennelly: Resonance selfshielding factors for heavy actinides 53

Errata 57

NUMBER 2

C. B. Besant and S. S. Ipson: Measurement of fission ratios in zero power reactors using solid-state track recorders 59
R. Wagner: Neutron wave experiments in a heavy water-natural uranium subcritical assembly 71
A. Asami and M. C. Moxon: The low energy scattering cross section of ^{10}B 85
M. M. R. Williams: Time eigenvalues and anisotropic disturbances in the pulsed neutron experiment 97
G. Grosshög: The pulsed neutron method applied to the interaction between moderators . 101

NUMBER 3

M. G. Cao, E. Migneco, J. P. Theobald and M. Merla: Fission cross section measurement on ^{233}U 111
M. Lalovic and H. Werle: The energy distribution of antimony–beryllium photoneutrons 123
C. Chiarella: Galerkin method solution of the neutron slowing down equations . . 133
G. B. Bishop and J. W. Cleaver: A uniform γ disc source using short lived isotopes . . 143
A. I. M. Ritchie, K. J. Maher and G. D. Trimble: Calculation of decay constants in beryllium oxide in the region of $(v\Sigma_{inel})_{min}$ 151

Letters to the Editors

N. G. Chrysochoides, D. C. Perricos and C. C. Zikides: Relative delayed neutron group yields from ^{231}Pa fission with fission neutrons 157
P. R. Smith: The probability distribution of prompt neutrons in an infinite homogeneous multiplying medium 159
P. R. Smith: Prompt neutron probability distributions in an infinite homogeneous medium due to a uniformly distributed source 164

Book Review 169

NUMBER 4

M. R. Iyer and A. K. Ganguly: Beta decay of ^{239}Pu fission products at short times after fission 171
N. D. Dudey, R. R. Heinrich and A. A. Madson: Reaction cross sections of $^{85}Rb(n, \gamma)$ ^{86m}Rb, $^{87}Rb(n, \gamma)$ ^{88}Rb, and $^{89}Y(n, \gamma)$ ^{90m}Y between 0·16 MeV and 1·5 MeV . . . 181
J. W. Boldeman and R. L. Walsh: The energy dependence of $\bar{\nu}_p$ for neutron induced fission of ^{235}U below 2·0 MeV 191
I. M. Tang and W. E. Kastenberg: Slowing down of neutrons in mixtures by the method of Green's functions 207

Letters to the Editors

A. K. Ghatak and O. P. Singh: Space dependent considerations in the non-linear prompt neutron kinetics of a nuclear reactor 217
O. Anglero and J. A. Wethington, Jr.: Conversion of a horizontal thermal column into a useful neutron source plane 221

Book Reviews 226

NUMBER 5

G. F. Knoll and N. Vagelatos: Measurement of the ^{171}Tm isomeric lifetime as a teaching laboratory experiment. 227
F. Rustichelli: Determination of the calibration factor $P(t)$ from absolute data 237
V. Mateiciuc, L. Aldea, M. Constantinescu, S. Dobrescu and T. Stadnicov: Doppler effect of 6·24 eV resonance in ^{121}Sb 245
A. Gibello, P. Moioli, F. V. Orestano and F. Pistella: Comparison between calculations and experiments in a microlattice with europium simulating plutonium 253
B. E. Clancy: The application of Chandrasekhar's method to deep penetration problems . 261
B. H. Patrick, M. G. Sowerby and M. G. Schomberg: Structure in the fission cross-section of ^{235}U 269
Book Reviews 275
Announcement 277

NUMBER 6

M. V. Polley and J. Walker: Neutron thermalization measurements in graphite by the reaction rates method, using a Ge(Li) gamma-ray detector 279
I. Aviram and Y. Yeivin: The PL/K method for solution of the one-velocity transport equation in doubly-periodic lattices of fuel elements. Part I: Theory 289
I. Aviram and Y. Yeivin: The PL/K method for solution of the one-velocity transport equation in doubly-periodic lattices of fuel elements. Part II: Applications 311
M. G. Sowerby, B. H. Patrick, C. A. Uttley and K. M. Diment: The ratio of the ^{6}Li(n, α) to ^{10}B(n, α) cross-sections from 10 eV to 80 keV and recommended values of the ^{10}B(n, α) cross-section 323

NUMBER 7

L. Mayer: Calculation of flux distributions in reactor sub-regions with generalized multiple collision probabilities 337
R. Conn: A Monte Carlo investigation of time-dependent thermal neutron behavior in small, noncrystalline moderators 359
T. D. Beynon, M. Coleman and M. A. W. Mondal: On the behavior of a neutron pulse in the vicinity of an inelastic threshold 367

Letters to the Editors

M. Hussain, S. Husain, E. Islam, N. Ameen, M. Enayetullah and N. Islam: A detector shielding for the measurement of total neutron cross-section at backward angles . . 385

NUMBER 8

S. P. Tewari and S. K. Trikha: Time and space dependent studies in beryllium oxide . 387
M. Jovanić: The heterogeneous method for thermal flux fine structure calculation in liquid moderated nuclear reactors 403
T. B. Ryves and D. R. Perkins: Thermal neutron capture cross-section measurements for ^{23}Na, ^{27}Al, ^{37}Cl and ^{51}V 419

NUMBER 9

Miriam Lemanska: The solution of the one-dimensional, multi-zone, multi-group diffusion equation using the Lie series method 431
T. Asaoka and J. A. Larrimore: Considerations on pulsed reactor optimization. . . 439
S. R. Bull, K. D. Dance and T. J. Connolly: Pulsed-source investigations on graphite systems 473

NUMBER 10

S. Ukai: A study on approximate methods for calculating the neutron flux in a heterogeneous reactor 479
T. D. MacMahon, R. Wellum and H. W. Wilson: Energy released by beta radiation following fission. Part I—^{235}U data 493
J. F. M. Rohde, M. Hissink and L. Bos: Equipment for sampling sodium 503
D. Meneghetti and K. E. Phillips: Fine-spectral interface effects of resonance scattering upon multigroup cross section averaging 509

Letters to the Editors

J. Costa Oliveira: Absolute measurement of reactor power by neutron noise analysis . 525

Book Review 527

NUMBER 11

E. Greenspan and K. B. Cady: The measurement of neutron importance functions . . 529
P. Lambropoulos and V. Luco: Functionals for discontinuous trial function flux synthesis . 551
T. D. Beynon: A kernel for the scattering of neutrons from an excited nuclear state . . 565

Letters to the Editors

E. R. Christensen: Surface roughened fuel rods in large, fast gas-cooled reactors . . 573

NUMBER 12

A. De Volpi: Neutron escape from water-moderated tanks 577
L. Twum-Danso and P. N. Cooper: Measurement of material buckling as a function of void fraction in a sub-critical assembly 587
Ira Aviram and Yehuda Yeivin: Solution of the neutron transport equation in a doubly-periodic array of singular absorption lines 593

Letter to the Editors

L. Bos: In-line sodium distillation unit 607

AUTHOR INDEX TO VOLUME 24

Aldea, L. p. 245
Ameen, N. p. 385
Anglero, O. p. 221
Asami, A. p. 85
Asaoka, T. p. 439
Aviram, I. pp. 289, 311, 593

Besant, C. B. p. 59
Beynon, T. D. p. 367, 565
Bishop, G. B. p. 143
Boldeman, J. W. p. 191
Bos, L. pp. 503, 607
Brogli, R. p. 11
Bull, S. R. p. 473

Cady, K. B. p. 529
